

## Product Information

- Safe access on stairwells has long been an issue, but not with our new Stairwell Towers.
- Our unit provides platform levels from 1.6m to 2.8m measurements taken from the lowest part of the tower. This gives the user working heights up to 4.8m The tower itself is only 780mm wide therefore will fit in both domestic and commercial stairwells.
- Extensions if ever needed are available.
- No-slip adjustable footplates secure the base of the tower, and with a platform length of 1500mm
